The venom of most snakes is not poisonous—it kills by breaking down the corpuscles in the blood, or by causing respiratory paralysis, which causes the victim to suffocate.

All arguments have two sides, but some have no ends.

*The Old Timer*

"You can tell some fellows aren't afraid of work—by the way they fight it."

Scholars see a direct connection between the development and widespread use of the longbow in England, and the

rise of political freedom there. This was the first time during recorded history that the average man has had access to

cheap, easily available, and adequate weapons to enforce his demands.
